Lewis J. Tutt, deputy prohibition administrator, is a logical development of dry law enforcement. It has long been claimed that the "little fellows" are the only ones who become involved with liquor violations. The time has certainly come to concentrate on individuals and groups really responsible for organized lawlessness.

But it is difficult to entertain high hopes of success. The bootleg industry is so profitable that those who enter it in a big way are able to erect defensive barriers which make them almost immune to official pressure. The barons of booze are smart enough never to be found at the point of sale or manufac-

ture. They leave all personal risks to the bartenders and laborers, though generously furnishing bail, paying court costs and defraying charges for expert counsel.

down the protective armament of the NTON EVENING IIIVIEN, "higher-ups" is a problem of the first magnitude. It is safe to say, however, that enforcement efforts are absolutely wasted when focused upon lesser members of the bootleg fraternity without regard to powerful agencies engaged in the production and distribution of illicit liquor.
